

To ALRC board: Request for Variance 12/3/18

I want to put my 100 gallon propane tank on lot 68 on the side of my fifth wheel. To put it in the back will require trenching an 18" deep, 35 foot line to the cost of about \$600 which is pretty steep on a lot I will just be renting. It would go in the appropriate position it is currently on on site #5 but on the other side (lot 67 side) and far enough from the road to meet regulations. Barb Gilger said it would meet all the requirements except being on the side + suggested I submit this request. I plan on moving my fifth wheel from spot 5 to 68 on December 10.

Thank you

Diane C. Phillips
