

Topics so far this Summer:

Continuing our conversations about orchard and/or blueberries to plant on DBR grounds.

Solar power installation to power our new septic tank pumps in a prolonged power outage after an extreme event such as a major quake.

How to support the new septic by educating all of us about what should and should not go into new system.

Greywater plumbing on individual lots.

Solar panels on individual lot owner rooftops.

Community solar array; community wind/solar hybrid.

Recycling is part of the Green Team:

Nearly 20 volunteers are doing daily bin and tote checks, gathering full containers and moving them up to the recycling trailer, and/or doing the run to the Jefferson County recycling center to unload the trailer. And EVERYONE WHO RECYCLES helps save the park money because the park can manage with fewer dumpsters, to the tune of over \$2000 annually. Please help us keep this effort going strong by PAYING ATTENTION when you sort your recyclables, and following the instructions on the signs and posters.

Funds: Our GT balance is \$554.52

Next meeting: Tuesday AUGust 6th at 4 PM in the office. All DBR residents are ALWAYS welcome to attend.
