

Document Review Process

Committees will present drafts of rule changes/verbiage to the board. If the board approves the changes, documents will go to the document review committee to ensure that they do not contradict either state and county laws or DBR CC&R or By-Laws.

If documents are cleared by the document review committee they will be forwarded to the office manager for implementation. The committee and board will be advised that document has been cleared and forwarded for implementation.

If changes are needed, documents will return to the committee for changes. The committee and document review committee will work together to bring documents into compliance. Once documents have been green lighted the committee will return to the board for board approval. When approved said document will the be forwarded to the office manager for implementation.
