

Safety Committee Report 9.24.20

The flu shot clinic was held August 31. 39 residents participated and were vaccinated.

The pharmacist from Rite Aid said she will keep us informed on the release of virus vaccines and will come out again next year for flu shots.

A special thanks to Gail Young and Carol Odee for keeping everyone distanced and safe.

The Safety Committee continues to get information to new leaseholders, including the Safety Manual and recycle flyers.

Thanks to Sam and Christie for helping with the handrail on the bridge behind Lot 114, making it much safer for entering the meadow.

The earthquake drill was conducted September 22 and was completed in about fifteen minutes. About 70% of the leaseholders and renters currently in the park participated. Those that were gone got a slip on their door letting them know we checked on them. This drill reminded everyone to check their fire extinguishers and know how to turn off their utilities in case of an emergency. Further information about fire extinguishers, recharging and disposing of them, will be sent out to everyone shortly.

If you weren't here for the drill did you have Go Bag or food, water and necessities in your car?
