

Safety Committee Report 4.28.2022

The committee has printed copies of the DBR Safety Manual for all the people new the park. Joann will hand deliver them. If you have questions, please see a committee member.

Reminders for use of the park fire pit. The hose behind the lower restrooms must be pulled out to the pit and turned on before lighting a fire. Whoever lights the fire is responsible for staying to completely extinguish the fire. It is not alright to pass off the responsibility of attending to or putting out the fire.

Hang on to some of your N-95 masks. In case of wildfires or a volcanic eruption they will help protect your lungs from particulates in the air.
