

Safety Committee Report 9.22.22

- There were a total of 30 people who got their vaccinations at the flu clinic, slightly down from last year. We hope to have Covid boosters available at the park soon.
- After talking with PUD, it appears getting our own fire hydrant(s) in the park would be cost prohibitive. We will check with Chief Orr whether draining our water tank (7500 gallons) would be helpful in the case of a serious fire.
- The radio check showed us what we expected, we have many radios but few that are effective for an emergency. We will sort through them, choose the best and try another test.
- The CERT people have asked that the unused CERT back packs be returned. We will pass that information along to the park.
- We are aware that there are dozens of Safety/CERT Shed keys floating around so the lock will be replaced and keys distributed to the office and the Safety Committee members.
- We have updated the Winter Preparedness Guide and will be distributing it by email and printed copies in mailboxes.
