

Safety Committee Report 10.2022

Kerrie and Lynn Angelero inventoried the medical supplies in the loft at the shop. There are canes, walkers, wheel chairs and more that can be checked out by anyone as need arises. The sign out sheet is in the loft on the desk and a list of all the items available will be on the DBR website under Committees/Safety.

After testing various radios that we had on hand, the committee decided on the best one to use for our hilly terrain and purchased four more. They will be distributed to the Street Sisters to pass information in the park in case of an emergency that would restrict use of cell phones and internet communication. They also connect to NOAA and have flashlights and other features that would be useful in an emergency.

After our first storm of the season, the committee encourages everyone to review the DBR Winter Preparedness Guide. Please follow the advise and prepare your lot and home for high winds, power outages and snow or ice.
