

Proposed Addition to Resort Rules re Cannabis growing in the Park

Understanding that many of our members may, under their health care professional's care, benefit from the medical use of cannabis for the relief of debilitating medical conditions, and that the growing of their own cannabis is preferable to purchasing it from a commercial enterprise, we have established the following rules governing that growth within Discovery Bay Resort.

1. Each Grower will be knowledgeable of and abide by Washington State and Jefferson County Law as it regulates the growing of medical cannabis and must have a current medical marijuana license.
2. Growers will plant, tend, and process medical cannabis only on their own site, with a limit 4 plants per site.
3. As required by Washington State law, Plants will be grown, harvested, and processed out of sight of public view as well as from neighboring sites within the park.

Specifically, all growers must comply with Washington State RCW 69.51A.260

(2) Neither the production nor processing of cannabis or cannabis-infused products pursuant to this section nor the storage or growing of plants may occur if any portion of such activity can be readily seen by normal unaided vision or readily smelled from a public place or the private property of another housing unit.

(Each DBR site containing a Park Model or RV comprises a housing unit).

4. All growing areas shall be at the rear of the member's site. Temporary screens, trellises, or shade cloths will be used to assist and to conceal plants at various stages of their growth (see LARC rules about which ones require LARC approval
5. Plant aroma is highest at time of harvesting and while drying; growers will confine the odor with plant protection enclosures. They will notify neighbors of processing times so they can avoid the area or close their windows.

Failure to follow these rules will subject the member to fines and other remedies as outlined in our governing documents.
