Re: New Signage for front and back gate

I suggest 2 new signs on our front fence. (36" x 36")

See Photos with corresponding number below.

1. Place one new sign on the fence parallel to 101 on the west side of the entrance. It is visible to traffic in either direction.
2. Remove the 2 signs on the west side next to the exit. On a side note, that bush could be removed.
3. Remove the sign on the front of the guard shack. Maybe put our address there instead. There is a red address sign that is hanging there horizontal to 101. It is not visible at all. It could be put in the center of the window of the guard shack.
4. Remove the green sign above the keypad and replace it with the "Caution Gate Will Only Allow One Vehicle at a Time – No Tailgating." That would put the warning at eye level, above the keypad and easier to see when you enter the park.
5. Remove the 5 signs on the east side of the entryway. Take sign #3 and put it on the back gate which currently has nothing.
6. Put the new sign on the fence on the east side of the entry.
7. I think this will be about \$800.
